

## Follow the Directions Sample Task: Tangram

---

*Cut out the shapes below. Then follow the directions to form a shape. When you think you have followed all the directions correctly and formed the correct shape, call your teacher over to check.*

## Directions

1. The square goes at the bottom. The edge of the square should be parallel to your desk or paper.
2. The largest triangle goes on top of the square.
3. All triangles should have their points facing up and their longest sides facing down.
4. The smallest triangle goes on top of everything.
5. The middle triangles go between the smallest triangle and the largest triangle.
6. No shape should overlap with another shape.
7. The triangles should all be centered with each other and the square.
